SAME

ABSTRACT : PROBLEM TO BE SOLVED: To actualize new service wherein a DVD video title and an HTML file provided over the Internet are merged.

SOLUTION: When a Web button of a remote control is pressed during the reproduction of DVD video, a DVD reproduction control program 116 takes a URL out of the navigation pack of the currently reproduced video projection unit and passes the URL, as an Internet address to be displayed to the WWW browser 17. Consequently, the HTML contents corresponding to the URL are obtained from an external server and displayed on a screen. Therefore, HTML contents corresponding to moving picture videos of scenes being reproduced can be obtained by the moving picture videos through the Internet and displayed associatively with the scenes being reproduced.
